-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Drawings

Figures 1, 2 and 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

1. Paragraph 4, the grouping of words "widely" appears to be incorrect with the intended word being "wide."
2. Paragraph 6, the word "conduct" appears to be incorrect with the intended word being "conduit."
3. Paragraphs 21 and 23, the grouping of words "variant of the a mounting leg" appears to be incorrect with the intended grouping being "variant of the mounting leg."
4. Paragraph 31, the grouping of words "incuding those tirghted" is incorrect with the intended grouping being "including those tightened."
5. Paragraph 32, the word "generaly" is incorrect with the intended word being "generally."

Appropriate correction is required.

Claim Objections

6. Claim 15 is objected to because of the following informalities: the word "anohter" is incorrect with the intended word being "another."

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Regarding Claims 1 and 15, the phrase "and the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "and the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Appropriate correction is required.

8. Claims 2-14 and 16-20 are indefinite for depending on indefinite claims.

Allowable Subject Matter

9. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
10. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-20 are allowable because none of the prior art of record suggests: (a) a spider plate having at least three leg portions extending generally outwardly of a central area thereof, a bracket mounted on each of said legs and positionally adjustable thereon at a selected position relative to the central area, means associated with each

Art Unit: 2875

bracket for securing its bracket in a selected position relative to its leg and for defining a plane spaced from the spider plate; (b) at least three brackets mounted on the periphery of a support plate and each positionally adjustable thereon at a selected position relative to the central area, and means associated with each bracket for securing its bracket in a selected position relative to the support plate and for defining a plane spaced from the support plate .

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

11. STRINGER ET AL. (US 5,075,831) teaches a light fixture having a substantially cylindrical lamp housing.

12. HENTZ (US 5,707,143) teaches a clip assembly for a downlight, which utilizes two, three or four clips.

13. HENTZ ET AL. (US 6,168,298) teaches a clip mounting arrangement for a lamp housing, such as a can, with the clips utilizing attachment means.

14. ZADEH (US 5,440,471) teaches a ceiling lighting fixture having a mounting plate with a plurality (preferably at least three) spring clips extending laterally from the mounting plate to contact the sidewalls of the cylindrical housing.

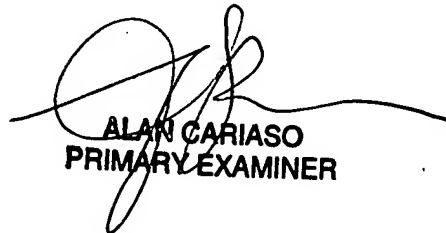

15. DEMSHKI ET AL. (US 5,823,664) teaches a recessed lighting fixture with an internal socket assembly that is longitudinally adjustable.
